Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers began to plant them around 11,500 years ago.

### Agriculture Questions and Answers | Study.com

Maize production generates at least 150,000 jobs in years with good rainfall and uses almost one-half of the inputs of the modern agricultural sector. Maize production exceeds 10 million tons in good years; owing to regional drought in the early 1990s, however, production fell to just over 3 million tons in 1992, and roughly 5 million tons of maize were imported, at a cost of at least US\$700 million.
