The first extracranial branch to arise is the posterior auricular nerve. It provides motor innervation to some of the muscles around the ear. Immediately distal to this, motor branches are sent to the posterior belly of the digastric muscle and to the stylohyoid muscle. The main trunk of the nerve, now termed the motor root of the facial nerve, continues anteriorly and inferiorly into the ...

Color Atlas Of Veterinary Anatomy The Dog And Cat [EBOOK]

Clinically oriented anatomy pdf By Keith L Moore is one of the best books of clinical anatomy. Especially for detailed studies. As for brief studies Snell's clinical anatomy is best but if you want to study anatomy in detail, then you should choose KLM anatomy. The reason is that this is a standard book of human anatomy and is advised by many anatomists.

The central nervous system includes the spinal cord and the brain. The brain is divided into 3 main sections—the brain stem, which controls many basic life functions, the cerebrum, which is the center of conscious decision-making, and the cerebellum, which is involved in movement and motor control. The spinal cord of dogs is divided into regions that correspond to the vertebral bodies (the ...
