Code Style Guide | Android Open Source Project

The Android user interface design guidelines have changes over the years. The first big change for designing Android applications came with the Android 3.0 (Honeycomb) release which introduced the Holo style. The Android 5.0 (Lollipop) release was again a radical change with the Material design. The material design introduces depth into the layout and uses much more animations to provide ...

Android 2.3.4 User's Guide

When java-style was asked, the preferred styles varied wildly and it came down to Android needing to simply "pick an ordering and be consistent." So we chose a style, updated the style guide, and made the IDEs obey it.
