### **Digital Animation Careers: Options and Requirements**

Computer animation is the process used for digitally generating animated images. The more general term computer-generated imagery encompasses both static scenes and dynamic images, while computer animation only refers to moving images. Modern computer animation usually uses 3D computer graphics, although 2D computer graphics are still used for stylistic, low bandwidth, and faster real-time renderings. Sometimes, the target of the animation is the computer itself, but sometimes film as well. Comp

### **Twelve basic principles of animation - Wikipedia**

In traditional animation, animators draw images on a transparent piece of paper fitted on a peg using a colored pencil, one frame at the time. Animators usually test animations with very rough drawings to see how many frames they would need for the action to work. The animation process of traditional animation can be lengthy and costly.
