Black Powder Solutions. About; BPS designs and manufactures patented Black Powder Magnetic Separation systems in a modular format for full flow application of hydrocarbon fluid transmission pipelines as a solution to pipeline corrosion. 4344 12th Street SE, Calgary, Canada

Black Powder Solutions

Black Powder Solutions Inc. (BPS) is a Canadian company that designs and manufactures patented magnetic separator systems as an inline, full-flow solution for removing Black Powder™ (black powder) contamination from hydrocarbon fluids and gases, refined products, petrochemicals and water.

Black Powder Solutions · 4344 12 St Se, Calgary, Alberta

Black Powder Solutions (BPS) is an innovative Canadian company offering the most effective solutions for Black Powder contamination in pipelines. BPS radial field magnetic technology removes Black Powder particles down to sub-micron levels in natural gas and hydrocarbon transmission lines.

Black Powder Filtration Removal in Natural Gas Pipelines ...

Black Powder Solutions is an emerging international company dedicated to the design and manufacture of Black Powder Separators for the purpose of removing Black Powder (BP) to sub-micron levels from natural gas and hydrocarbon fluid transmission pipelines with no flow restriction.

Ultrafiltrex — Pipeline Filtration & Black Powder Filtration

Black Powder Solutions is a business licenced with City of Calgary, Approvals Coordination. The business created date is April 9, 2019. The address is 4344 12 St Se, Calgary, Alberta.

Powder Process-Solutions

Black Powder Filtration INNOVATIVE PIPELINE SOLUTIONS With over 100 years' experience in the design and manufacture of high performance magnetic systems, we serve the oil, gas and aviation fuel sectors with a range of premium solutions for critical operational pipeline problems, such

as pipe corrosion,contamination, and black powder filtration.

Black Powder Filtration Systems - Integrated Flow Solutions

Black powder is an industry name for the abrasive, reactive particulate contamination present in all gas and hydrocarbon fluid transmission lines. Black powder ranges from light brown to black, and the mineral makeup varies per production field around the world. Black powder forms throughout the pipeline process; from producing formations, through well bores, into gathering lines, in ...
