each position the search result came in, and the rating column represents the human rating of the search result from 1 to 5 where 5 is high relevance and 1 is low relevance. 1. Write a query to compute a metric to measure the quality of the search results for each query. 2.

### **Board Query Answers Round 4**

If you're formatting for display to the user, don't use round. Use `to_char` (see: data type formatting functions in the manual), which lets you specify a format and gives you a text result that isn't affected by whatever weirdness your client language might do with numeric values. For example: `regress=> SELECT to_char(float8 '3.1415927', 'FM999999999.00');` `to_char ----- 3.14`  
(1 row)
