**Advanced Learner's
Dictionary**

David Crystal investigates the nature of the impact which the Internet is making on language. There is already a widespread popular mythology that the Internet is going to be bad for the future of language - that technospeak will rule, standards be lost, and creativity diminished as globalization imposes sameness.

Language and the Internet - Cambridge Core

An alphabet is a standardized set of basic written symbols or graphemes (called letters) that represent the phonemes of certain spoken languages. Not all writing systems represent language in this way; in a syllabary, each character represents a syllable,
