### **European Urinalysis Guidelines - OOO FEM**

The 2014 CLSI guidelines retained the current MICs for cefazolin against enterobacteriaceae, but specified that susceptible results were based on a dosing regimen of 2 grams intravenously every 8 h and is specific for non-urine isolates . One of the major changes included in these guidelines involves the reporting of a urine-specific cefazolin MIC for enterobacteriaceae (susceptible  $\leq 16$  mcg/mL).
