DONT TAKE HIM! Culver has to be the worst professor at SLU. He posts the lecture outline on Moodle for the whole semester and its literally just random thoughts he has, most of which are irrelevant to the course. During class he reads straight from the outline. His class is so boring and he isn't helpful at all because the tests come from the book.

Cooling Load Lecture Outline Louisiana State University
In Louisiana's humid climate it is critical to calculate the latent load - the amount of dehumidification needed for the home. If the latent load is ignored, the home may become uncomfortable due to excess humidity. The Sensible Heating Fraction (SHF) designates the portion of the cooling load for reducing indoor temperatures (sensible cooling).
