examples, including those in this book. The book's examples use Google Chrome and its built-in development tools. The chapter ends by creating and discussing a simple D3 'Hello World' example. This code is then examined in the Chrome developer tools environment.

Learn to Create D3.js Data Visualizations by Example ...

The data in D3.js is bound to the DOM elements. Through binding, D3.js tracks a collection of objects along with their properties, and based upon rules that you specify, it modifies the DOM of the document based upon that data. This binding is performed through various operators provided by D3.js, which can easily be used to describe the mapping of the visual representation of the data.
