Emollients or emollient with active ingredient (for example menthol 1%). Crotamiton 10% cream (for example Eurax) or capsaicin (0.025%) cream for localised itch. Topical corticosteroid (mild to moderate potency) apply sparingly once daily for 2 to 3 days if the area is inflamed but not infected. Review after 7 days.

Atopic Dermatitis and Eczema. Causes, symptoms and ...

Synopsis There are around 200,000 healthcare-associated infections (HAIs) in Australian acute healthcare facilities each year. This makes HAIs the most common complication affecting patients in hospital. As well as causing unnecessary pain and suffering for patients and their families, these adverse events prolong hospital stays and are costly to the health system.
