Mitsubishi 4G94 engine reliability, problems and repair. The largest engine in the 4G9 family was 4G94, which had a displacement of 2.0 liters. The engineers took a cast-iron 4G93 cylinder block and did a good job with it. They increased the deck height to 231.3 mm and increased the cylinder bore from 81 mm to 81.5 mm. Into this block, they installed a 95.8 mm long-stroke crankshaft, 152.9 mm ...

MIVEC (Mitsubishi Innovative Valve timing Electronic Control system) is the brand name of a variable valve timing engine technology developed by Mitsubishi Motors. MIVEC, as with other similar systems, varies the timing, lift and duration of the valves by using two different camshaft profiles. At low speeds, a mild (low-lift) cam lobe provides stable idle, lower emissions and increased torque ...

MIVEC (Mitsubishi Innovative Valve timing Electronic Control system) is the general name for all engines equipped with the variable valve timing mechanism developed by Mitsubishi Motors. Mitsubishi Motors has been focusing for a long time on technologies to control valve timing and amount of lift with the aim of achieving high power output, low fuel consumption, and low exhaust emissions.
