Thinking, learning and teaching: Improving impact studies ...

ABSTRACT: Teacher professional development has long been of interest since it affects teachers' learning, the practice of teaching, and student learning. In reality, as substantial resources have been spent on professional development, policy makers increase their search for evidence-based research about its effects on teachers' and students' outcomes.

Teachers and students are at the heart of education structure, interaction, and even innovation. Teachers are the conveyors of ideas and practices and the source of knowledge of their learners. Libyan teachers are fulfilling this role in a challenging context, because they are teaching students whose education process has been unstable for a long time.
