Cooling fans cool entire Harley cylinder head

Both the fans I'm looking at can be operated by a thermal switch which allows the fan to cool the engine after the bike has been shut off. Most reviews say the Wards fan (probably the one I'll get) will cool the top end down in ~ 5 minutes, then the thermal switch shuts the fan off, hopefully eliminating the hot start issue.

All the targets are the exact diameter of each corresponding fan. There is no home team advantage given to Love Jugs in the nature of the test whatsoever, our actual advantage is that we have two very powerful fans, while Lenale and the Parade fan have only one fan. I use a simple measuring device and technique that can be repeated by about anyone.
