Rapid Prototyping With Js Agile Javascript Development

Here's what you should know about the difference between agile and prototyping: Prototyping. Prototyping begins before development is underway. Prototypes can range from a quick sketch on a whiteboard to a fully interactive mockup. The first step is an initial prototype of the project, which will be presented so you can give feedback.

What's the difference between agile development and ...

Agile vs Prototyping 1) What is Prototyping. Prototyping is an attractive and feasible model for those complex and large systems which have no manual process or existing system for determining the requirements. Prototype development is based on currently known requirements. Prototype gives client the actual feel of system.
