Water 4.0 | Berkeley Engineer Spring 2014

Increasing population density and changing weather patterns stress our cities' water supply, but developing technologies offer positive changes and investments to conserve this most vital resource in coming years. UC Berkeley professor David Sedlak, author of Water 4.0: The Past, Present, and Future of the World's Most Valuable Resource, discusses future water infrastructure with host ...

Water 4.0—the next revolution in urban water systems

Water 4.0, the Smart Water Industry, or just plain efficient operation (in truth, whatever you want to call it) is central to these ways of working, and it is through the development of the design principles of Industry 4.0 that we can deliver the future of the water industry.

Living on Earth: Water 4.0

Water 4.0—the next revolution in urban water systems. Three years ago, Sedlak was part of a team that built a 40-acre scale model open wetland pond along the Santa Ana River in Southern California, designed to break down hormones and other contaminants before the water was released to the river.

Water 4.0: The Past, Present, and Future of the World's ...

Water 4.0. As with the Australian plants, there was opposition from environmental groups, resulting in delays and modifications. "The total price for California's first big coastal desalination plant is estimated to be around \$800 million for a plant that will deliver about... 50 million gallons of water each day.

Water 4.0 - The Key Point

Water 4.0: The Past, Present, and Future of the World's Most Vital Resource. New Haven: Yale University Press. Chicago / Turabian - Humanities Citation (style guide) Sedlak, David L. Water 4.0: The Past, Present, and Future of the World's Most Vital Resource. New Haven: Yale University Press, 2014. MLA Citation (style guide)

Water 4.0: The Past, Present, and Future of the World's ...

Water, as Sedlak suggests, is the element that holds a city together and allows it to grow. Although the road signs that will lead us toward Water 4.0 may be hard to read now, Water 4.0 provides a useful map of where we have been—and of where we need to go.

Water 4 0 The Past

"Water 4.0" is a delightful, fascinating and ultimately very balanced treatment of humans and water: past, present, and future. David Sedlak has won many awards and recognition for his innovative and high quality teaching at Berkeley, and it shows through in the book.

Water 4.0: The Past, Present, and Future of the World's ...

The author starts by describing Water 1.0, the early Roman aqueducts, fountains, and sewers that made dense urban living feasible. He then details the development of drinking water and sewage treatment systems—the second and third revolutions in urban water.

Water 4.0: The Past, Present, and Future of the World's ...

I was expecting David Sedlak's "Water 4.0: The Past, Present, and Future of the World's Most Vital Resource" to be aimed at the coming water shortage and the political consequences on a world-wide basis. It is more of a history of water delivery and sewage disposal rather than water rights. Given that my expectations were not met, the book was ...

Water 4.0: The Past, Present, and Future of the World's ...

Water 4.0: The Past, Present, and Future of the World's Most Vital Resource by David Sedlak. Turn on the faucet, and water pours out. Pull out the drain plug, and the dirty water disappears. Most of us give little thought to the hidden systems that bring us water and take it away when we're done with it.
